Relevant Building Code clauses:

New Zealand Building Code (NZBC):

If designed, used, installed and maintained in accordance with FastRight guidance, the above mentioned product[s] will meet or contribute to meeting the following provisions of the NZBC:

- * B1.3.1, B1.3.2, B1.3.3 (b), (f), (g), (h), (q), B1.3.4
- * B2.3.1 (a), B2.3.2 (a)
- * F2.3.1

Statement on how the building product is expected to contribute to compliance:

B2.3.1 (a) (ii) and (iii) and B2.3.2:

This BPIR Statement is to be read in conjunction with the Product Durability Information Available on the PKF Website. These durability charts are an alternative solution to Table 4.1 NZS 3604:2011.

When used, handled, stored and installed in accordance with the above conditions these products will meet the NZBC Clause B2 requirement of not less than 50 years life expectancy.

F2.3.1:

These products are safe when handled. There are no requirements for this product in order to comply with Acceptable Solution F2/AS1, First Edition Amendment 3, 2017.

- *options for compliance set out in section 19 of the Act (regulations, acceptable solution, verification method)*
- *standard or technical document that describes the performance of the building product or the relevant specifications to which the building product was manufactured*
- *physical properties of the building product*
- *how the building product is intended to be used.*

Limitations on the use of the building product:

FastRight Screw Products should be used only for the purpose for which each of them is designed and manufactured in accordance with technical information supplied. In case of doubt as to use, PK Fasteners should be contacted for guidance.

Design requirements that would support the use of the building product:

Verification of the applicable design assumptions stated in current PK Fasteners Guide for the product.

Installation requirements:

Refer to relevant section of the current PK Fasteners Guide for the product.

Maintenance requirements:

Subject to compliance with the FastRight Durability Product Selection, there are no maintenance requirements. Depending on specific weather exposure and salt spray environments, there may be evidence of 'tea staining' on the surface of Stainless Steel fixings. Tea staining is a visual issue only and DOES NOT affect the structural integrity of the fixing.

Is the building product/building product line subject to warning or ban under section 26?:

Yes No

If yes, description of the warning or ban under section 26:

Date:

0	1	1	2	2	3
